

Remote viewing and map dowsing practice resource

Lyn Buchanan (April 2016)

Remote viewing/map dowsing practice

Please see this contact we have received from the USA. Devon Dowers has received this message from Lyn Buchanan of the USA and it is posted here for your interest and for practice purposes.

Dowsing practice resource

I was the trainer in the U.S. military's Controlled Remote Viewing (CRV) unit, and have been training since I retired from the military.

I have around 400 "targets" for remote viewing practice, and most of them have dowsing maps associated with them. The viewers are tasked to describe the "target site" before looking at their feedback, and since remote viewing includes its own styles of dowsing, every "target" that is of a stationary location has a dowsing map included.

I've been told recently that this is a potentially useful site for dowers, who can just ignore the viewing part and practice their map dowsing, but that most dowers do not know about it. So I thought that I would let you take a look and see whether or not your members would like to use this collection as a practice asset.

I have been posting these targets every Wednesday (with a break in 2013 and 2014) since January of 2006. They are free for public use and can be tried at random or can even be assigned for group practice or even for dowsing contests, training, whatever.

Your members would not be responsible for finding the feedback information, of course, but could simply use this resource for dowsing practice. If you would like to see an example, take a look at the following pages:

Dowsing Map:

<http://crviewer.com/targets/151111/151111DowseMap.htm>

Feedback:

<http://crviewer.com/targets/151111/151111.htm>

A "calendar" of the "target locations" can be found at: <http://crviewer.com/targets/targetindex.php>

When you click on any date on that "calendar", you are taken to a page where there is a link to the dowsing map and another link to the feedback map. The feedback shows a second copy of the map (usually at the bottom of the feedback information page) that gives the correct location. There is also information about the "target" for the viewers, but for dowsing practice, that may not be important.

My overall web page is: <http://crviewer.com> and the index of targets is found under the main page menu selection of "Free resources / Target of the Week".
