

Toby's Garden Festival at Powderham Castle May 3rd and 4th 2019

Gwynn Paulett May 2019

The sun shone this year on both days, which made demonstrating dowsing to members of the public an enjoyable experience. I lost count of how many times I heard "Wow! I didn't know it worked." As always, the children who tried their hand got a dowsing reaction first try.

At both ends of the Devon Dowsters' gazebo, there were conveniently placed water and energy lines to dowse, which was a relief as we were located in a pretty tight spot. This is a wonderful opportunity to talk to interested people about dowsing, what it can be used for, and the different dowsing tools available.

The Devon Dowsters shop sold out of 3.2 mm dowsing rods which proved very popular. There was a lot of interest in chakra pendulums as well as the crystals.

A big "thank you" to all Devon Dowser members who attended and helped to demonstrate dowsing, worked in the shop, as well as those who provided the pre-event organisation.

Powderham Castle in the sunshine is such a beautiful setting to share our ancient art.
